

An overview

Asbestos awareness training course

Asbestos Awareness

T. +44 (0) 121 236 9900

Is your workplace familiar with asbestos awareness?

Despite new legislation, thousands of tons of asbestos still nests in buildings across the UK. Every year, over 5,000 people die from asbestos-related diseases. Training in the safe use of asbestos can dramatically reduce this figure.

UKATA

Who is asbestos awareness training for?

Are you familiar with the codes, working practices and regulations in place to protect against asbestos-related illnesses? Do you know the different types of asbestos? No? The asbestos awareness course covers these vital questions and shows you how to protect yourself and others from asbestos exposure. If you need basic asbestos awareness to gain access to certain sites, then this is the course for you.

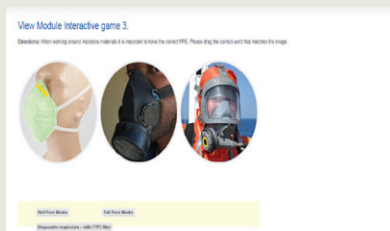

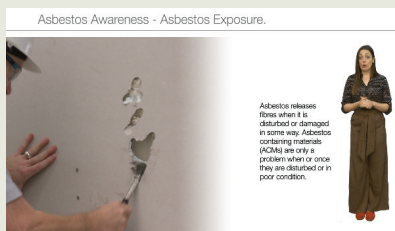

What does the asbestos awareness course cover?

The asbestos awareness course shows you:

- *The basic principles of asbestos awareness.*
- *The damage that asbestos can cause, using real-life examples.*
- *How to respond if you suspect you have identified asbestos in a building.*

What is the benefit of asbestos awareness training to your business?

Your staff can gain quick and effective training in asbestos awareness and understand how to deal with asbestos materials. Staff can complete their training at any time to suit your needs.

Video Presentations.

Interactive Games.

Final Exam – Certificates Provided.

This course is purely for general guidance. Always follow all codes, practices and regulations that are in place for asbestos awareness. Also, ensure that you know what your working practices, policies and procedures are for dealing with asbestos.

Completing this course does not permit, licence or authorise you to remove or repair asbestos under any circumstances.
